

More accurate control of hole size in various sheet materials up to 1/8" thick. Each step bit drills a range of sizes. The further the bit advances, the larger the diameter of the hole gets. Because step drill bits enter the material one step at a time, the operator can drill the desired hole by counting the individual steps, or by using a washer as a simple stop. The self starting tip eliminates the need for pilot holes. Applications include junction boxes, switch boxes, metal studs, electrical applications, lighting fixtures, auto body work, and many other uses.

## M2 HSS FAST SPIRAL STEP DRILL

- ◆ 1/4" Hex Impact Shank
- ◆ M2 HSS
- ◆ Fast Spiral Flutes
- ◆ Jam Free Performance
- ◆ Self Starting Split Point
- ◆ Bright Finish
- ◆ Sold Individually
