CENTRAL CLEANING SYSTEMS

Advantage Series Indicating Inlet

Enjoy the advantages...the technology, intelligence and convenience...of a NuTone Advantage Series Indicating Inlet. It's the easiest way ever to know when it's time to change the dirt receptacle bag in your CV850, CV750 or CV653 Central Cleaning Power Unit. The power unit tracks how many hours it's been vacuuming, and reminds you both on the power unit, and now at the inlet, with a color change of the LED from green to amber.

FEATURES:

- When you open the inlet and insert the hose, a green LED indicates system is powered, ready for use. (With a hose that has a switch, the LED will light when the hose is switched on.)
- Amber LED indicates it is time to replace the dirt receptacle bag in the Power Unit
- No extra wiring needed; installs with 361 Mounting Bracket

SPECIFICATIONS:

Use	Only with CV850, CV750 or CV653 Power Units
Finishes ..	White – CI-370W Beige – CI-370BG
Installation	Use 361 Mounting Bracket
Size3¾" W x 3" H x ⅝" D installed
