

EPIQ 3

The EPIQ 3 series includes both standard retrofit kits and remodel retrofit kits with housings attached - all with high CRI in 3000K Warm White dimmable light. Upgrade to a modern square look with simple click-on trims, available in three finishes.

Performance

- Small aperture CLIQ family members with remodel kit options for a regressed round LED downlight and square trims in three finishes
- High CRI (90+) retrofits are dimmable with most incandescent (triac) and low voltage electronic dimmers (5-100% light control)
- E3-Series retrofit and remodel downlights are Energy Star compliant

Construction

- Metal core PCB with aluminum heat sink and 99% diffuse reflecting cone for optimum longevity and light output
- Stamped aluminum with durable baked enamel finish trims
- Click-on trim options are injection molded heavy-duty plastic with polyurethane finish for a strong, wear-resistant surface
- Frosted polycarbonate lens diffuses light

Installation

- Steel torsion clips secure downlight into most standard 3" cans with GU10 sockets (requires 3-1/2" high clearance); or use remodel versions which need only 5" ceiling clearance
