ALL-PRO™

DESCRIPTION

Small aperture housing for accent and task lighting where housing will be in direct contact with ceiling insulation. The EI400AT AIR-TITE construction limits air exchange between the ceiling plenum and heated or air conditioned areas.

Housing Features

• EI400AT is an AIR-TITE fixture sealed and gasketed to prevent airflow between plenum spaces and heated areas.

• Integral thermal protector guards against misuse of insulation materials and improper lamping.

• Double wall housing construction.

• Junction Box is listed for through branch circuit wiring and has seven 1/2" knockouts and four non metallic (NM) sheathed cable knockouts with true pry out slots. NM sheathed cable knockouts include built in strain relief and require no additional clamps.

• Captive bar hangers span 24" joists and allow housing to be positioned at any point of fully extended hanger bars. Score lines provided for easy field shortening for 12" joists. Unique arrowhead design provides "Rapid" installation.

Installation Features

• 5 7/8" Height allows use in 2"x 6" joist construction.

• Housing can be removed from plaster frame for junction box access.
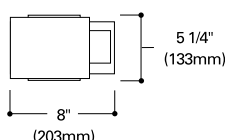

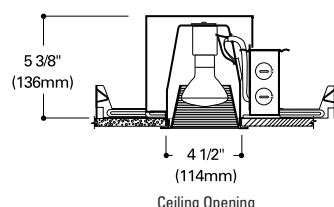

• Accommodates 1" thick ceilings.
