faster • safer • easier®

18V Lithium-Ion
GATOR®

Battery-Powered Cutting Tools

The most comfortable
and efficient solution.

Why Lithium-Ion Batteries...

- Weigh 40% less than NiMH or NiCd batteries
- Last 70% longer than NiMH or NiCd batteries
- No memory effect
- Smart chargers for maximum battery life
- No hazardous materials

The New Standard

Gator® Battery-Powered Cutting Tools from Greenlee have always represented the most comfortable and efficient solutions when it comes to reliable cutting of cables. However, outstanding results are no reason for us to rest on our laurels. On the contrary, we are always committed to improve the good and make it even better. The result: our new tool generation with Lithium-Ion power.

When it comes to Cutting tool intelligence, efficiency and ergonomics, Greenlee Gator® Tools are **faster**, **safer** and **easier** than ever before.

More Intelligent

- All tools automatically retract when a cutting or punching cycle is complete. No need to use a second trigger to get ready for the next cut.
- Pistol grip tools have a "Retraction Stop" feature. The operator can stop the ram retraction at any point by simply tapping the trigger. This saves time and battery life when making repetitive cuts.
- LED light provides the operator with the battery charge and tool maintenance status.
- Two-stage hydraulic system on pistol grip tools provides fast advance and power speeds, saving time.
- Smart chargers control the charging current, charging voltage and battery temperature to maximize battery life.

More "Green"

- Greenlee battery-powered cutting tools now use biodegradable oil.

More Power

- State of the art 18V lithium ion (Li-ion) battery provides 70% more cycles per charge and faster cycle times.
- Available with 120V, 12V or 230V battery charger.
- Available with 120V or 230V corded adapter in place of batteries and charger.

More Ergonomic

- Forward handle position improves tool balance.
- One trigger controls all tool functions.
- Over molded tacky grip areas make gripping the tool easier and more comfortable.
- LED work light illuminates dark work areas.
- On all tools the cutting head rotates 350° to aid getting into tight locations.

CUTTER PRODUCT COMPARISON CHART

	ES32L	ESG50L	ESC85L	ESG45L	ETS8L	ETS12L
	The ES32L is a small, lightweight cutter for cutting up to 500 kcmil copper and aluminum. The scissor style jaws make it very easy to cut in tight locations.	This is a powerful cutter for copper and aluminum cables up to 2" (50 mm) in diameter. The flip-top style cutting head is extremely durable.	Cutting large diameter copper and aluminum cables up to 3-1/4" (85 mm) is easy with the ESC85L. The scissor style blades can pick cable up off of a floor and the included assist handle makes the tool easy to control.	This tool is designed specifically to cut ACSR, guy strand including EHS, and ground rod. The flip-top style cutting head is the most durable on the market.	The ETS8L cuts wire basket type cable trays. It makes flush cuts with no burrs in less than 2 seconds. It handily beats manual cable cutters for speed and ease of use.	Cutting one-time disposable locks, container seals, and small diameter bolts is fast and easy with the ETS12L. The small cutter head gets into spaces that other cutters can't.
Length	14-5/8" (372 mm)	15-3/4" (400 mm)	21" (533 mm)	16-5/8" (423 mm)	12-1/8" (308 mm)	13-5/8" (346 mm)
