# FERRET WiFi QUICKSTART GUIDE

## Step 1: Download the Ferret WiFi Free App

Scan the QR Code below or search for "**Ferret WiFi**"

Download on the App Store

ANDROID APP ON Google play

iOS V8
or later
recommended

Android V6
or later
recommended

**NOTE:** During installation or first use of the app you must give access to the phone/tablet's photo gallery to allow you to save photos/video footage.

## Step 2: Connect to your Ferret WiFi

1.  Turn on your Ferret WiFi camera. The camera power switch is at the back of the camera under the back cap. The camera will take about 2 seconds to boot and power on.

**NOTE:** The camera is IP67 rated only when the back cap is in place.

2.  On your phone/tablet, turn on WiFi and search for the Ferret WiFi camera in the WiFi list. The WiFi camera has a built in WiFi hotspot so no other WiFi network is needed.

**NOTE:** The camera will not link via Bluetooth – it is WiFi only.

## Step 3: Enjoy using your Ferret WiFi and start saving time & money, working safer & smarter.

Please read the instruction manual for further information.
