Branch Circuit Breaker, AFCI/GFCI 1-Pole 20A 120V, 10KA Interrupt Rating

UPC Code: 078477814581

Country Of Origin: Mexico

Leviton Circuit Breakers provide overload and short-circuit protection and feature an all plug-on design. AFCI/GFCI circuit breakers offer protection both from electrical fires that could result from arc-faults and from electrical shock due to ground faults in one smart device. All hot and neutral wires terminate at custom lugs in the panel, not at the circuit breaker*, so the entire panel can be wired at rough-in without circuit breakers installed. Branch circuit breakers are easily plugged-on at final installation. Circuit breakers also feature color indicators in the handle to easily see operational status at-a-glance.

**For applications up to 60A when using copper wire; or 50A when using aluminum wire*
