66 Space Indoor Load Center with Main Lug

Indoor Load Center, NEMA 1 with Main Lug, 200 Amp, 66 Spaces, 22 KA Interrupt Rating, Enclosure and Interior Only

Leviton Indoor Load Centers are easy to install and feature a white enclosure housing white circuit breakers for a modern, appealing unit. All hot and neutral wires terminate at custom lugs in the panel, not at the circuit breaker*, so the entire panel can be wired at rough-in without circuit breakers installed. Branch circuit breakers are easily plugged-on at final installation. An optional observation window in the cover allows at-a-glance operating status of all the circuit breakers.

*For applications up to 60A when using copper wire; or 50A when using aluminum wire
