

NDB300AB

Door Speakers for Intercoms, 4-3/16w x 6-5/16h x 1-3/8d, projects 1-9/16" from surface in Antique Brass

Overview

Door speakers have a voice communications interface that mounts adjacent to an entry door. Available in a color to complement your door and entryway, the door speaker also features a lighted pushbutton – so there's no need for an extra doorbell.

- Two-way voice communication between the resident and visitor occurs through the unit's built-in speaker, providing clear, on-the-spot interaction
- Door station mounts recessed into the wall using an NRKR300D rough-in, providing you the perfect fit during installation
- NuTone outdoor stations are weather-safe and designed to withstand rain and other elements, giving you complete confidence in the performance of the system, no matter what the weather
- Surface frames NES300DWH (White) and NES300DBL (Black) provides a finished look for a complete visage
- The NDB300 Series door speaker is for use with the NM100 and NM200 'Master' stations only
