

1. Extend, Connect

The telescoping frame of the QTRE080R extends horizontally from joist to joist for a stable mount.

Rethink Retrofit.

2. Attach Existing Duct

With the duct connector attached to the frame, there's no connection hassle.

3. Insert Housing

Connect the electrical and simply slide the housing into place. Everything is aligned perfectly.

Introducing the Broan Easy-Retrofit Ultra Silent™ Fan.

Retrofitting to an Ultra Silent™ fan has never been easier. The QTRE080R Ultra Silent™ Retrofit Fan means upgrading bath ventilation doesn't have to mean upsetting everything. Like the sheetrock, and the paint job—not to mention your customers. Broan makes it easy with the new QTRE080R Retrofit Fan.

A specially designed housing, telescoping frame and new duct connector revolutionize retrofit bath fan installation.

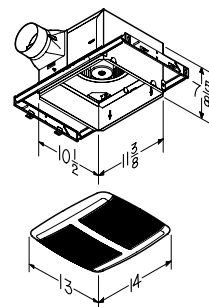

The telescoping frame quickly adjusts to the space between joists.

Get an Ultra Silent™ fan in less time, with less work.

With a patented telescoping frame and a unique duct attachment system, installation is simplified. The fan goes in faster, connects to joists more solidly, and eliminates unprofessional "rigging." There's also no patching, priming or painting when you're done. That's what the Broan QTRE080R Retrofit Fan does for you.

- UL Listed for use over tub or shower when installed in a GFCI protected branch circuit
- HVI Certified
- Energy Star qualified
- Fits 2" x 8" ceiling construction

Our retrofit housing doesn't require mounting ears, which simplifies placement through the drywall.

Fan Model	CFM	Sones	Energy Star	Bath Sq. Ft.	Ducting
QTRE080R	80	0.8	Yes	75	4"

Energy Star fans use 65% less energy, on average, than standard models and may qualify for local utility rebates.
