easy to install

I did not have an exhaust fan in my bathroom, this was easy to install.

✔ **Yes**, I recommend this product.

So quiet

Purchased three of these Broan exhaust/bathroom fans, excellent choice!

✔ **Yes,** I recommend this product.

QUITE

Replaced 2 old fans Had to work in limited area still had to cut and repair sheetrock to get to duct. Fans are very quite must check to make sure they are turned off after use

✔ **Yes,** I recommend this product.

Easy install, works well

Review **1**Votes **0**

After staring at a hole in my bathroom ceiling for the last 25 years left from a previous fan, I finally decided to install a new one. I liked the low noise this fan was advertised with and the great price. I installed it using a 20' flexible insulated hose and was disappointed with how loud it was. A call to Broan and I was advised to run a 3' straight pipe directly off the fan and then hook up the flexible tube, huge difference, very quiet. And after a long hot shower the mirrors and walls are all clear and dry. Great product, great price, great assistance from Broan.

✔ **Yes**, I recommend this product.

Great Replacement Fan!!

Wanted to replace a fan that sounded like a helicopter coming in to land. This fan did the job. Although I had a contractor install the fan, the retrofit was very easy to do. This fan is very quiet which is what I was looking for. Only very minor issue had to do with the cover. It doesn't fit securely on one side of the fan. Checked to make sure the clips were all installed correctly and they are. Just one corner won't snug up against the ceiling. Not a big issue. Would highly recommend this fan.

Super Quiet!!!

This unit is super quiet. When I first flipped the switch, I thought it might have been wired wrong, as I didn't hear anything for a couple of seconds. I did need to buy a large vent pipe, as my original one was 3" and this unit has a 4" pipe. The room moisture is GONE!

✔ **Yes,** I recommend this product.

Duct Type & Length

How long of a run with 4" PVC can you run and the adder for elbows?

Is it beneficial to use PVC?

1
answer

Answer this Question

BroanCustomerService · 3 years ago

Thank you for your question on the model **RB110** exhaust fan. It is fine to use PVC to duct the **RB110**. You can run 4" rigid duct work 13 feet straight. You need to reduce that distance by four feet for every elbow.
